RECORD RETENTION:

Identification of Internet Protocol Addresses:

ConnectTo currently maintains its dynamic IP address log files for a period of from zero to fourteen days. If asked to make an identification based upon a dynamic IP address that was used more than 14 days prior to records request, ConnectTo will not have information to provide.

*Note: ConnectTo's system of allocating IP addresses uses Dynamic Host Configuration Protocol (DHCP.) Dynamic IP users are not assigned a single or constant IP address. Dynamic IP addresses are assigned and have the potential to change at any time. As a result, it is necessary in all requests for subscriber information linked to a specific IP address that you supply specific date and time including time zone of the incident when an IP address is involved.

Identification of records Based on Telephone Number:

ConnectTo can only provide account information on telephone numbers for which we currently or have historically provided service. ConnectTo retains the following information about telephone toll calls for a period of 18 months, as currently required by Federal Communication Commission regulations §42.6: the name, address, and telephone number of the caller, telephone number called, date, time, and length of the call.
