A. Responsibilities

The Company will provide facilities, equipment, and services to its local loop demarcation point. The Company is responsible for the provisioning and maintenance of its facilities, equipment, and services to the local loop demarcation point, including those located at that point.

The Customer is responsible for the completion of services beyond the Company's local loop demarcation point.

Customer requested services beyond the local loop demarcation point may be provided by the Company at the Customer's expense.

B. Local Loop Demarcation Point

This demarcation point designates the end of the Company's network facilities (local loop) and the beginning of the intrabuilding network cable (INC), if any, provided by the building owner.

Where a Local Loop Demarcation Point lacks sufficient power and/or space to support provisioning of new service, such service will be provisioned as close as practicable to the existing demarcation point.

This demarcation point designates the end of the INC provided by the building owner and the beginning of simple or complex inside wire provided by the end-user.
2. The INC demarcation point is located at the distribution terminal(s) on each floor in a multi-story building, except as set forth in Paragraph 3 following and B.4 preceding.

 - b. It is the property owner's responsibility to provide and maintain INC within and between buildings on a continuous property. The Company may, at the Customer's request and expense, provide INC.
4. Where an owner of Continuous Property requests additional Local Loop Demarcation Points or changes an existing local loop demarcation point, the owner will be required to pay for any additional network cable and facilities required through special construction agreements set forth in Cal. P.U.C. Schedule CLC 2-T, Sheet No. 5, except as provided in B.4 preceding.
5. The INC and Inside Wire Demarcation Points are located as described in B. and C. preceding.

- e. Call Forward Variable permits the routing of all incoming calls to one assigned phone number upon activation.
 - f. Select Call Forwarding allows the automatic forwarding (transfer) of calls from up to ten preselected numbers to another telephone number. The line can be restored to normal operation at any time. Select Call Forwarding can be used in conjunction with Call Forwarding.
 - g. Remote Access to Call Forwarding allows activation and deactivation of the Call Forwarding feature and changes to the forwarded to number from a location other than where the service is located.
 - h. Call Tracing allows customers to trace annoying and harassing calls.
 - i. Call Waiting ("CW") sends a tone signal while a call is in progress to indicate a second call is waiting; and, by operation of the switchhook, to place the first call on hold and answer the waiting call. Operation of the switchhook permits passage back and forth between the two calls, but a three-way conference cannot be established.
 - j. Cancel Call Waiting ("CCW") allows the dialing of an activation code prior to making a call, to cancel the CW feature. CCW must be activated each time CW is to be canceled. Exception: If a Custom Calling Service that provides "flash privileges" such as Three-Way Calling is subscribed to, the CCW feature can be activated while an incoming or outgoing call is in progress. The rates and charges for CW in the Pacific Bell exchanges include the CCW arrangement.

- k. Three-Way Calling allows the addition of a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The initiator of the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.
- l. Speed Calling allows placing calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. The feature is available as an eight code list or thirty code list. Either code list may include local and/or toll telephone numbers. To establish or change a telephone number in a code list, an activation code is dialed, a second dial tone is received and a one or two digit code (for the eight code and thirty code lists, respectively) plus the telephone number is dialed.
- m. Priority Ringing differentiates incoming calls from up to ten preselected telephone numbers by signaling with a distinctive ringing pattern. If Call Waiting is also subscribed to, a distinctive tone is heard for the selected set of numbers. The last incoming call can automatically be added to the list of preselected numbers.
- n. Repeat Dialing allows calls to be automatically redialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the originating telephone line with a distinctive ringing pattern when the busy number and the originating line are free. Calls may continue to be made and received while the feature is activated.

- o. Call Screen allows the automatic blocking of incoming calls from up to ten preselected telephone numbers (including numbers from calls that have just been received). The list of numbers can be changed at any time. Callers whose numbers have been blocked will hear a recorded message and no usage charges will apply. The calling party's number will not be delivered or announced to the call recipient under any circumstances.
 - p. Call Return allows the return of a call to the last incoming call whether answered or not. Upon activation, it will redial the number automatically and continue to check the number every 45 seconds for up to 30 minutes if the number is busy. A distinctive ringing pattern signals when the busy number is free. When answered, the call is then completed. The calling party's number will not be delivered or announced to the call recipient under any circumstances.
 - q. Caller I.D. allows the customer to view the phone number of the person calling before the phone is answered.
 - r. Caller I.D. With Name allows the customer to view the listed name associated with the telephone number before the phone is answered.
 - s. Caller I.D. Blocking Select allows the customer phone number to be blocked from selected Caller I.D. units.

6. Operator Services

a. Operator Handled Calling

Operated Handled Calling Service is provided to customers and users of Utility's local intraLATA and interLATA calling services and to users accessing presubscribed public pay phones or customer provided stations for operator assisted calls.
